## **What's New In?**

One of the most popular and well-known ways of getting free stock

images is through online stock photo sites. There are thousands of them, and the best way to find them is to search Google and enter the keywords “stock photo sites”. However, browsing the results can be rather time-consuming. That’s where sites like Pixabay come in handy. They allow you to create free stock photo sets right in the browser and share them directly with the public. You can also download them or copy them to your clipboard. The most popular sites

are Pixabay, Pexels, and iStockphoto, which are the best alternatives to DeviantArt. They are all dedicated solely to offering stock photos, and you'll need a subscription to access the full catalog. Pexels is one of the most popular online alternatives to the classic DeviantArt.com website. What is Pexels Desktop? Pexels Desktop is a handy app that allows you to explore the Pexels library with just a few clicks. The app is simple and effective. In a matter of seconds, you can search for

photos, manage your favorites, download them, and use them in your projects. The app includes a bunch of useful features, such as:

○Search With just a few keywords, you can easily find photos that are interesting to you.

○Like Photos You can share your favorites with your friends through Facebook and Twitter.

○Download You can download the photos directly to your computer, or send them to the clipboard.

○Browse Photo Sets You can browse a collection of sets that

include photos in one place.

Pexels Desktop is absolutely free, and it's a great way to explore the extensive Pexels image library without the need of a web

browser. 3 Ways to Download Files from Pexels (Pexels Desktop)

1. Search for a File It's very easy to locate your desired files on Pexels. Just search for them in the Search tab, and you'll be able to browse all the collections that include them.

2. Open Your Favourites You can quickly access your favourite photos by opening

the Photos tab. This is where you will find all the images that you have liked.

3. Download a File to Your Computer You can download the files directly to your computer. To do that, click the Download button next to each photo, and it will open a new tab. Then, you can copy the URL and paste it into any software that needs it, including your web browser.

4. Save an Image to the Clipboard You can also save a file to the clipboard. To do that, right-click on an image and select “Copy Image Address.”

Then, just paste this URL into
